

COMPANY OVERVIEW

Searidge Technologies develops innovative technology to improve safety and efficiency in the aviation market.

We are a global leader and preferred partner for Digital Towers and Advanced Airport solutions. Through operational enhancements, collaboration, AI and automation, our team helps our customers proactively transform the way they offer and deliver services to meet changing demands.

Searidge has technology at over 35 sites in 25 countries, including the largest digital tower projects in the industry: Australia, Hong Kong, Hungary, Singapore and the United Kingdom.

MILESTONES

WE ARE DIFFERENT

COLLABORATIVE | ADAPTIVE | INNOVATIVE

Unfortunately, proprietary technologies still dominate the industry, making collaboration difficult, much to the frustration of airports and ANSPs that wish to unlock their data and corresponding efficiencies.

We have architected our solutions to be open, modular, hardware/platform agnostic, and adaptive allowing our customers complete freedom and flexibility to leverage existing infrastructure and future-proof their investments for growth and change. Our approach to software and solution design allows us to offer fully customizable hardware, user interfaces and specialized video applications that support any size of airport and complexity of operation.

"We challenge ourselves and our customers to adopt innovation"

Moodie Cheikh, CEO
Searidge Technologies

TRANSFORMATIVE TECHNOLOGY

Searidge is driven by innovation. Our market-leading technology combined with our extensive experience integrating best of breed airport and tower systems has allowed us to successfully deliver a variety of solutions to ANSPs and Airports to increase safety and efficiency at their airports.

FOR ANSPs:

- Digital Tower
- Remote Tower & Contingency Operations
- ASDE-X & A-SMGCS Integration Augmentation
- Tower Blind-Spot Coverage
- Runway Monitoring
- Digital Weather Information
- Approach Monitoring

FOR AIRPORTS:

- Remote Apron Control
- Remote De-icing
- Remote Gate Occupancy
- Runway Lighting Automation
- Airport Traffic Lighting Control
- Integrated Operations Centre

LOCATIONS

Canada (HQ) • UK • Dubai •
Hong Kong • Singapore • Qatar
